

European Travellers Club

For interoperable Public Transport in Europe

The European Travellers Club (ETC) is an initiative of several European e-Ticketing Schemes in Public Transport (Members) and the Open Ticketing Institute (OTI). We are supported by several industry Partners. Together, we want to ensure that all travellers in Europe can use trusted, easy and seamless Account-Based Ticketing services across the whole of Europe, integrated with journey planning and travel information.

In the future Account-Based Travelling will be implemented by individual schemes and transport operators in different ways. The ETC will make sure that there is interoperability across borders in Europe including security and privacy regulation.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 636126.

European Travellers Club

- A **not-for-profit entity**;
- Goal is to ensure that all travellers in Europe can use trusted, easy and **seamless** Account-Based Ticketing (ABT) services across the whole of Europe, **integrated with journey planning and travel information**;
- Transport Authorities and e-Ticketing schemes are **members**;
- **Integrated ticketing system** for rail, bus, tram, metro, etc.;
- Existing, **national systems can coexist** with the new ABT system;
- Outcomes, specifications, interfaces, API's **will be published**.
